1. **DEVICE Package** is for *device* support only. *User security, User support, and Compliance are not included* .
   - we *secure hardware* utilizing our firewall, endpoint protection, and security operations center.
   - our entry level package, allowing organizations to improve their security posture by securing their site and devices.
   - this package is not appropriate for Clients with regulatory requirements.
2. **PLUS Package** is best for Clients with compliance requirements (HIPAA, FTC, PCI, CIS, etc.) & need cybersecurity insurance.
   - we *promote* compliance with security *best practices* , utilizing our tools, training, and support.
   - our standard and most utilized package, which includes User Support and User Security.
   - with this package, we will deploy tools to allow for compliance with most compliance regulations but full adoption may be slowed due to business priority, need, or employee adoption of best practices. We will educate and reinforce the importance of best practices, but will not actively enforce and remediate deviations from compliance standards.
3. **CIS Package** is best for Clients for whom security and leveraging technology is a strategic objective.
   - we *enforce* compliance through automatic remediation and working with leadership to enforce compliance.
   - our advanced package is for organizations committed to full enforcement & compliance with regulatory requirements.
   - is available to existing clients that have been on the PLUS package for 12+ months and are in full compliance.
4. Setup & Installation - On PLUS/CIS Plans, delivery and setup are included for most items purchased from Computer Corner.
5. We share our volume discounts and "Smart Buy" pricing for enterprise-grade technology with all managed clients.
