- SMB Package** is for *device* support only. **User security, User support, and Compliance are not included**.
 - we **secure hardware** utilizing our firewall, endpoint protection, and security operations center.
 - our entry level package, allowing organizations to improve their security posture by securing their site and devices.
- PLUS Package** is best for Clients without formal regulatory compliance requirements.
 - we **promote** compliance with security **best practices**, utilizing our tools, training, and support.
 - our standard and most utilized package, which includes User Support and User Security.
 - with this package, we will deploy tools to allow for compliance with most compliance regulations but full adoption may be slowed due to business priority, need, or employee adoption of best practices. We will educate and reinforce the importance of best practices, but will not actively enforce and remediate deviations from compliance standards.
- CIS Package** is best for Clients with formal compliance requirements (HIPAA, FTC, PCI, CIS, etc.)
 - we **enforce** compliance through automatic remediation and working with leadership to enforce compliance.
 - our advanced package is for organizations for whom security is a strategic objective.
 - is available to existing clients that have been on the PLUS package for 12+ months and are in full compliance.
